WILSON RENE GUEVARA AREVALO
+971 565712642 - WILSONR100@GMAIL.COM

PROFILE

Experienced and proactive software leader with 12+ years in full-stack and data engineering across cybersecurity, fintech, and edtech. Skilled in leading cross-functional teams, managing lifecycles, and mentoring developers to deliver impactful solutions.

Advocate of Clean Code, Agile, and automated testing, with hands-on expertise in Jira, risk evaluation, stakeholder collaboration, and coding in Python, Java, Kotlin, and React.

CORE COMPETENCIES

- **Leadership & Delivery:** Led teams (up to 8), managed roadmaps, split epics, and drove multi-environment releases.
- **Agile Project Management:** Experienced with Scrum, Jira, and Confluence; skilled in sprint planning and stakeholder alignment.
- **Architecture & Integration:** Built scalable APIs and integrated systems like TransUnion, Stripe, and Microsoft Dynamics.
- **Risk & Cost Management:** Evaluated technical risks and contributed to cost-sensitive projects like Wiris at Alef Education.
- **Quality & Observability:** Set up automated tests, Prometheus dashboards, and logging for traceability and performance.
- **Mentorship & Collaboration:** Mentored developers since 2013; promoted clean code and cross-team alignment.

TOOLS & TECHNOLOGIES

- **Languages & Frameworks:** Python, Kotlin, Java, Spring Boot, ReactJS, Vue, PyTorch, C++, Scala
- **DevOps & Observability:** Prometheus, Jenkins, Docker, Kibana, ArgoCD
- **Project Management:** Jira, Confluence, Agile/Scrum
- **Other:** ML, Triton Inference Server, Elasticsearch, Milvus, Whisper, GraphQL, TransUnion API, Stripe, Microsoft Dynamics CRM

EXPERIENCE

Senior Data Engineer

Cybersecurity Company (NDA). Dubai, UAE. October 2023 - Present

- ✓ Managed roadmap, sprint boards in Jira, and collaborated with stakeholders to refine and split stories for multi-team initiatives.
- ✓ Lead full development of internal tool used by support team. Conducted stakeholder meetings including planning, reviews and demos.
- ✓ Lead end-to-end development and deployment of ML inference pipelines using Triton, PyTorch, and Whisper to optimize GPU utilization.Staff Senior Developer

Staff Senior Developer
Hyphen Group. Singapore. July 2022– June 2023

- ✓ Spearheaded 3 multinational fintech platforms, contributing to platform strategy and long-term planning through organized backlogs and milestone-based roadmaps.
- ✓ Integrated critical third-party systems (e.g. TransUnion, Stripe), and introduced automated QA pipelines that significantly reduced post-release issues.
- ✓ Acted as a tech lead, mentoring teammates, reviewing code, and organizing retrospectives to improve velocity and delivery.

Full-Stack/ Staff Senior Developer
Alef Education. Abu Dhabi. January 2019 – May 2021

- ✓ Led integration of Wiris Quizzes with strategic budget oversight, ensuring cost-effective implementation and seamless UX.
- ✓ Delivered large-scale assessment platform used by tens of thousands daily. Helped achieve two Guinness World Records for concurrent usage.
- ✓ Won internal hackathon with a regulatory-compliant assessment tracking tool, now in production.

Senior Software Engineer
PSL. Medellin, Colombia. October 2017 – December 2018

- ✓ Built CI/CD pipelines that reduced release cycles from days to minutes.
- ✓ Researched and integrated Big Data technologies (Hadoop, Phoenix, Zeppelin) for strategic client recommendations.

Software Analyst Specialist
Easy Solutions/Cyxtera. Bogota, Colombia. February 2013 – October 2017

- ✓ Took leadership roles across products, including Clientless (end-to-end delivery) and an internal release automation tool.
- ✓ Provided mentorship, architectural guidance, and feature design on multiple internal and external-facing products.

Junior Software Developer/Researcher
Azuan technologies. Bogota, Colombia. August 2012 – January 2013

- ✓ Developed POCs for secure keylogging protection using C++ and low-level Windows APIs.

EDUCATION

Deep Learning Specialization
DeepLearnig.AI, Coursera. June 2023 – August 2023

- ✓ Topics: supervised learning, CNNs, RNNs, sequence models, deployment strategies.

Electronic Engineering
Universidad Nacional de Colombia. January 2007 – 2012

- ✓ Thesis: "Detecting driver fatigue using 3D imaging and ML (OpenCV, OpenNI)."
